

# Instructions to Authors

Thank you for contributing to The **International Journal of Nutrology (IJN)**. Please read the instructions carefully and observe all the directions given. Failure to do so may result in unnecessary delays in publishing your article.

*International Journal of Nutrology (IJN)* is the official scientific journal of Associação Brasileira de Nutrologia (ABRAN) and aims to publish articles that contribute to the improvement and the development of the practice, research, and training in Nutrology and related specialties. The journal publishes

human and animal studies. Public health and epidemiologic studies relevant to human and animal nutrition, and investigations that employ epigenetic, genomic, proteomic, and metabolomic approaches are encouraged.

The *International Journal of Nutrology* is published quarterly, in April, September and December, and publishes Original Articles, Review Articles, Case Reports, Letter to the Editor and Consensus on nutrition and nutrology. Manuscripts must be prepared in accordance with the «Uniform Requirements for Manuscripts Submitted to Biomedical Journals» developed by the International Committee of Medical Journal Editors available at <http://icmje.org/>. All submissions are peer reviewed. Manuscripts can be submitted free of charge (no APCs) through IJN's online submission website: [www.manuscriptmanager.net/ijn](http://www.manuscriptmanager.net/ijn).

IJN also publishes supplements. The symposium organizer needs to provide the topic and content of the symposium to the Editorial Office, including title, location, and date of the meeting; the names and affiliations of potential guest editors; the sponsor(s) of the meeting; the sponsor(s) of the publication; and the program from the meeting along with the names of the speakers. After that, the individual articles will be submitted to anonymous peer review of each article. To be considered for publication, supplement articles must be received within 3 months of each symposium or workshop.

## Manuscripts format

The manuscripts may be written in English in an editable format and must have Abstracts and Keywords both in Portuguese and English.

**Original article:** The text should have up to 6.500 words, not including references and tables. It should have up to 5 tables and/or figures. The number of references should not exceed 40. Their structure should contain the following:

**1. Title page:** article title both in Portuguese and English; full name of all authors; academic or professional affiliation of each author; institutions names where the study took place; running title; corresponding author name, degree, full address, e-mail and phone number.

**2- ICMJE Col forms:** One form for each author (available at <http://icmje.org/>)

**3- Abstract:** original articles need structured abstract with 250 words at the most: objective, methods, results and conclusions. Following the abstract comes keywords (six at the most), based on MeSH (Medical Subject Headings), published in Medline and available at: "<http://www.ncbi.nlm.nih.gov/mesh/>" [www.ncbi.nlm.nih.gov/mesh/](http://www.ncbi.nlm.nih.gov/mesh/). Portuguese version of title, abstract and keywords based on DeCS (Descritores em Ciências da Saúde, <http://decs.bvs.br>).

**4- Main text:** It must be anonymous and containing introduction; casuistry or material and methods; results; discussion; conclusion; acknowledgments.

**5-References:** number references as they are first cited in the text with Arabic numerals. Use Vancouver style; list all authors until the sixth, using et al. after the third when more than six; when reference authors are cited in the text cite the first et al. For references with more than two authors, unpublished data or personal communication must be cited as such between parentheses and cannot be listed as reference; use journal abbreviation from Index Medicus.

**Review article:** The text should have up to 5.000 words document, not including references and tables, resulting from an investigation that analyzes, systematizes and integrates the results of published or unpublished research, in order to present progresses and developmental trends. Their structure should contain the following:

**1. Title page:** article title both in Portuguese and English; full name of all authors; academic or professional affiliation of each author; institutions names where the study took place; running title; corresponding author name, degree, full address, e-mail and phone number.

**2- ICMJE Col forms:** One form for each author (available at <http://icmje.org/>)

**3- Abstracts:** structured abstract with 250 words at the most: objective, methods, results and conclusions. Following the abstract comes keywords (six at the most), based on MeSH (Medical Subject Headings), published in Medline and available at: "<http://www.ncbi.nlm.nih.gov/mesh/>" [www.ncbi.nlm.nih.gov/mesh/](http://www.ncbi.nlm.nih.gov/mesh/). Portuguese version of title, abstract and keywords based on DeCS (Descritores em Ciências da Saúde, <http://decs.bvs.br>).

**4- Main text:** It must be anonymous and containing introduction; casuistry or material and methods; results; discussion; conclusion; acknowledgments.

**5-References:** number references as they are first cited in the text with Arabic numerals. Use Vancouver style; list all authors until the sixth,

using et al. after the third when more than six; when reference authors are cited in the text cite the first et al. For references with more than two authors, unpublished data or personal communication must be cited as such between parentheses and cannot be listed as reference: use journal abbreviation from Index Medicus.

**Short article:** The text should have up to 2.000 words document, not including references and tables. A brief document presenting the preliminary (or partial) results of an original scientific or technological research that usually requires quick diffusion. Their structure should contain the following:

**1. Title page:** article title both in Portuguese and English; full name of all authors; academic or professional affiliation of each author; institutions names where the study took place; running title; corresponding author name, degree, full address, e-mail and phone number.

**2- ICMJE Col forms:** One form for each author (available at <http://icmje.org/>)

**3- Main text:** It must be anonymous and containing abstracts, introduction; casuistry or material and methods; results; discussion; conclusion; acknowledgments.

**4-References:** number references as they are first cited in the text with Arabic numerals. Use Vancouver style; list all authors until the sixth, using et al. after the third when more than six; when reference authors are cited in the text cite the first et al. For references with more than two authors, unpublished data or personal communication must be cited as such between parentheses and cannot be listed as reference: use journal abbreviation from Index Me

**Case report:** Document that presents the description of a specific case. Includes a review of the topic on similar cases. The text should have up to 1.500 words document, not including references and tables. Their structure should contain the following:

**1. Title page:** article title both in Portuguese and English; full name of all authors; academic or professional affiliation of each author; institutions names where the study took place; running title; corresponding author name, degree, full address, e-mail and phone number.

**2- ICMJE Col forms:** One form for each author (available at <http://icmje.org/>)

**3- Abstracts:** containing objective, case description, results and conclusions. Following the abstract comes keywords (six at the most), based on MeSH (Medical Subject Headings), published in Medline and available at: "<http://www.ncbi.nlm.nih.gov/mesh/>" [www.ncbi.nlm.nih.gov/mesh/](http://www.ncbi.nlm.nih.gov/mesh/). Portuguese version of title, abstract and keywords based on DeCS (Descritores em Ciências da Saúde, <http://decs.bvs.br>).

**4- Main text:** It must be **anonymous** and containing introduction; casuistry or material and methods; results; discussion; conclusion; acknowledgments.

**5-References:** number references as they are first cited in the text with Arabic numerals. Use Vancouver style; list all authors until the sixth, using et al. after the third when more than six; when reference authors are cited in the text cite the first et al. For references with more than two authors, unpublished data or personal communication must be cited as such between parentheses and cannot be listed as reference: use journal abbreviation from Index Medicus.

**Letters to the editor:** The text should have up to 1.000 words document, not including references and tables. Critical, analytical or interpretive positions on documents published in the journal, interesting topics, or articles published in other journals, which in the opinion of the Editor constitute an important contribution to the community. Their structure should contain the following:

**1. Title page:** article title both in Portuguese and English; full name of all authors; academic or professional affiliation of each author; institutions names where the study took place; running title; corresponding author name, degree, full address, e-mail and phone number.

**2- ICMJE Col forms:** One form for each author (available at <http://icmje.org/>)

**3- Main text:** It must be **anonymous** and containing introduction; casuistry or material and methods; results; discussion; conclusion; acknowledgments.

**4-References:** number references as they are first cited in the text with Arabic numerals. Use Vancouver style; list all authors until the sixth, using et al. after the third when more than six; when reference authors are cited in the text cite the first et al. For references with more than two authors, unpublished data or personal communication must be cited as such between parentheses and cannot be listed as reference: use journal abbreviation from Index Medicus.

**Special Numbers:** organized after authorization by the Editor-in-chief.

#### General Guidelines

1. You must submit a digital copy of your manuscript. Hard copy submissions are not accepted.
2. Keep the format of your manuscript simple and clear. We will set your manuscript according to our style—**do not try to “design” the document.**
3. The manuscript, including the title page, abstract and keywords, text, references, figure captions, and tables should be typewritten, double-spaced in 12-point Arial font with double-spaced, with 2 cm margins justified.

4. Each figure should be saved as its own separate file. Do not embed figures within the manuscript file. This requires special handling by Thieme’s Production Department.

5. Keep abbreviations to a minimum and be sure to explain all of them the first time they are used in the text.

6. The manuscripts should be written in **English.**

7. The authors should use Système International (SI) measurements. For clarity, non-metric equivalents may be included in parentheses following the SI measurements.

8. Use generic names for drugs. You may cite proprietary names in parentheses along with the name and location of the manufacturer.

9. Credit suppliers and manufacturers of equipment, drugs, and other brand-name material mentioned in the manuscript within parentheses, giving the company name and primary location.

10. The papers will be submitted to 2 peer reviewers appointed by the Editor-in-chief. Within the next 60 days, the authors will be informed about the acceptance of the material.

11. Once accepted, articles might be subject to minor corrections following the editorial rules. Any changes in form, style or interpretation must be authorized by the authors.

12. The reviewers might suggest changes before the manuscript publication.

13. In case of manuscript rejection, the corresponding author will receive the letter containing the reviewers’ comments on the manuscript.

#### Final correction

The PDF of the accepted manuscripts will be sent to the corresponding author for approval. The final version must be sent back to the editor in two weeks. If the editor does not receive the corrected proofs in 2 weeks, the manuscript will be published, even with no final approval of the authors.

#### Ethics standards:

No data or image identifying a patient can be used without formal consent (patient permission forms are available at: [www.thieme.com/journal-authors/](http://www.thieme.com/journal-authors/)); studies using human beings or animal trials must follow ethical standards from the International Committee of Medical Journals Editors – ICMJE, as well as approval of original institution’s Ethics

Committee; conflicts of interest must have a ICMJE form filled in by all authors (available at: <http://icmje.org/>); commercial marks should be avoided; authors are the sole responsible for opinions and concepts in the published articles, as well as for the reference accuracy.

#### Authorization Letter

The corresponding author should send a letter authorizing publication, signed by all

co-authors, ensuring the uniqueness of the publication, ie, the article should not be posted on other news outlets, not be available online. Articles already published in other media should say when and where they were accepted for publication.

#### Standards for articles structure

##### Acknowledgements

Acknowledgments to contributors may be cited at the end of the article, before references.

##### Format of presentation

##### Title Page

##### Title

The article title should be short, clear and concise. When necessary, one can use a subtitle title (with a maximum of 50 characters including spaces). The title must be written in Portuguese and English.

##### Authors

The authors’ full name should come just below the title with the highest degree and affiliation of each author.

##### Name of Institution

The name of the institution where the work was carried out must be cited and also the authors’ affiliation. Regarding studies presented in meetings, conference or congress, the name of the event should be cited.

##### Conflict of Interest Statement (if any):

There is a conflict of interest when the author(s) had/has financial or personal relationships that may have biased or improperly influenced his actions. The potential conflict of interest exists regardless of whether the interested parties consider that these relationships influence or not their scientific judgment. Authors should download the ICMJE conflicts of interest form (available at: <http://www.icmje.org/>), and upload the completed form. In addition, we ask that you describe in the Cover Letter any financial or personal relationship that you had or have, at the time of writing or submitting the article with people or institutions and that could give rise to a conflict of interest in relation to the article that is forwards for publication.

##### Authorship

Authorship will be based on the criteria of the International Committee of Medical Journal Editors (ICMJE): 1. Substantial contributions to the conception or design of the work; or the acquisition, analysis or interpretation of data for the job; AND 2. Write the work or critically review it for important intellectual content; 3. Final approval of the version to be published; 4. Agreement to be responsible for all aspects of the engagement to ensure that questions related to the accuracy or completeness of any portion of the engagement are properly investigated and

resolved. In the case of collective authorship, the names of those responsible for the work will be included followed by “and the Group ...” when all the members of the group consider themselves co-authors of the work. If you want to include the name of the group, although not all its members are considered co-authors, the formula used will be to mention the responsible authors followed by “on behalf of the Group ...” or “by the Group ...”.

In any case, the names and institutions of the group members will be included in an annex at the end of the manuscript. The authors will be noted both on the first page of the title and in the Add/Edit/Remove/Author section. Declaration that they have read and approved the manuscript and that the requirements for authorship have been met. The Journal declines any responsibility for possible conflicts derived from the authorship of the works published in the Journal.

### **Publishing Permissions**

The authors are responsible for obtaining the appropriate permissions to partially reproduce material (text, tables or figures) from other publications.

These permissions must be requested both from the author and from the Publishing House that has published said material.

Publishing permission is required from the institution that has funded the research. Declaration that the content of the article is original and that it has not been previously published or sent or submitted to any other publication, in its entirety or in any of its parts. The authors should be aware that not revealing that the material submitted for publication has already been totally or partially published constitutes a serious breach of scientific ethics. Likewise, authors who reproduce previously published materials in their article (text, tables or figures) are responsible for obtaining the appropriate permissions to reproduce said materials in the journal. The authors must have obtained written authorization from both the author and the publisher that has published this material and send a copy of them together with the article to the Journal.

### **Redundant or duplicate publication**

**The editors and Thieme combat plagiarism, double publication, and scientific misconduct with the software CrossCheck powered by iThenticate. Your manuscript may be subject to an investigation and retraction if plagiarism is suspected.**

The journal does not accept previously published material and will not consider manuscripts that are simultaneously submitted to other journals, or redundant or duplicate publications, that is, articles that substantially overlap with another already published, printed or in the electronic media. Authors must inform in the cover letter about previous submissions or publications of the same work, in whole or in part, that may be considered redundant or duplicate publication.

These restrictions do not apply to published abstracts of communications, papers or conferences presented at national or international scientific meetings.

### **Mailing Address**

Repeat the name of the corresponding author and add your full address, phone and email.

### **References**

Limit to 40 references for original articles, 25 for case reports and 100 for review articles. References should be arranged in the text in the order they are cited and presented in numerical order of appearance in the text as superscript numbers. The references should be the most updated references in the area. References of textbooks with more than 5 years should be limited to those that are fundamental. Mention all authors up to a total of 6. If the article has more than 6 authors, cite only the first 6 followed by et al (preceded by a comma). When the quote is an article already accepted for publication, include the phrase “in process of publication,” indicating the journal and year. Unpublished results or studies presented at medical conferences are not recommended for citation.

If the reference is an organization its name should be cited. Example: World Health Organization.

### **Manuscript Submission**

Manuscripts must be submitted through IJN's online submission website: [www.manuscriptmanager.net/ijn](http://www.manuscriptmanager.net/ijn).

*net/ijn*. Use the guidelines from Instructions to Authors to prepare your submission. All correspondence should be with the Regional Editorial Offices. If a paper is accepted, the Production Office will correspond with the author via e-mail.

### **Submission Preparation Checklist**

As part of the submission process, authors are required to check off their submission's compliance with all of the following items, and submissions may be returned to authors that do not adhere to these guidelines.

1. The submission has not been previously published, nor is it before another journal for consideration (or an explanation has been provided in Comments to the Editor).
2. The submission file is in OpenOffice, Microsoft Word, RTF, or WordPerfect document file format.
3. Where available, URLs for the references have been provided.
4. The text is single-spaced; uses a 12-point font; employs italics, rather than underlining (except with URL addresses); and all illustrations, figures, and tables are placed within the text at the appropriate points, rather than at the end.
5. The text adheres to the stylistic and bibliographic requirements outlined in the Author Guidelines, which is found in About the Journal.

### **Privacy Statement**

The names and email addresses entered in this journal site will be used exclusively for the stated purposes of this journal and will not be made available for any other purpose or to any other party.
