

Open Access Publishing – Author Information

Open Access (OA) means free reading and use of scientific literature and related content via the Internet.

1. OA Publishing at Thieme

There are two main ways to publish OA articles: “gold” and “green.”

Gold OA means that immediately upon publication your article will be made free to read via the Internet with additional usage rights. In return for this instant and global dissemination and availability of your article, an Article Publication Charge (APC) is paid either by yourself as the author or by your institution or funding organization.

Green OA means that after 12 months you may self-archive the accepted manuscript. You may not use the final published version, but you may deposit your publication as the accepted manuscript in institutional online repositories.

Thieme offers authors the choice by providing both gold and green OA options, with the preference for gold as it provides immediate access to the edited, published version of your article with well-defined reuse rights under a sustainable financial model.

2. General Information – Thieme Open

The Thieme Publishing Group is one of the market-leaders for scientific information and services in medicine and chemistry. Since the end of 2013, we have offered authors an OA publication service called Thieme Open, <http://open.thieme.com>.

This OA service includes rigorous peer-review, professional in-house editorial services, fast publication times, and worldwide access via Thieme’s electronic journals, <https://www.thieme.de/en/thieme-connect/home-3939.htm>.

It also includes reference linking and long-term archiving, distribution, including the Digital Object Identifier (DOI), as well as entry into PubMed Central and indexing in OA-relevant search engines.

Our services for the Thieme OA authors:

1. Publish under a gold OA model in our suite of gold OA journals or choose from one of our more than 150 classic journals that also offer you an OA option. Transfer your copyright and declare no conflict of interest electronically by signing the Copyright Transfer Agreement and Conflict of Interest forms.
2. Be certain that your OA manuscript will enjoy the same high-quality standards of peer-review and superior production services as you enjoy in all our journals.
3. Post the final version of your article immediately onto any repository if published under the gold OA option.
4. Deposit the final published version of your article immediately as a PDF on your personal homepage.
5. Protect your rights as an author when you publish your article under a “CC-BY-NC-ND license.” Information at: <https://creativecommons.org>
6. Be compliant with requirements, mandates, and policies of funders such as NIH, OSTP, Horizon 2020, DFG, and RCUK. For details see: <http://www.sherpa.ac.uk/romeo/search.php>
7. Be assured that your work will be archived long-term at archiving services such as CLOCKSS or Portico.
8. Be assured that your paper is discovered on major search engines and indexing services such as PubMed Central, Directory of Open Access Journals (DOAJ), and Scopus.

3. Why is Open Access important for you?

OA is an additional publication service among the services and products that are provided by the Thieme Publishing Group.

The most important reasons to publish OA are the immediate, global access, and sharing via the citable version of an article. This means a high visibility leading to a potentially higher usage, more citations, and a higher impact of your article by extended search ability and discoverability. Your article quickly gains wide scientific impact. These play an increasing role if you, your project, and the publication of your results and data are publicly funded. Please find a glossary of bibliometrics at: <http://www.bibliothek.kit.edu/cms/english/bibliometrics-glossary.php>

Maintaining a high-level quality standard undergoing a rigorous peer-review process by international and leading specialists, Thieme OA articles are published quickly and may include multi-media enhancements. Furthermore, your OA publication meets equivalent funder mandates, requirements, and policies.

The advantages of publishing OA in summary:

4. What does this mean for you?

What you should be considering before the transfer of your copy- and usage rights:

Your position as the copyright holder

As copyright holder you own exclusive rights on usage and re-usage of your work by third parties. The type and level of protection of copyrights and licenses vary between countries.

The Rights Transfer — your rights as an author

When you decide to publish with Thieme, we kindly ask you to assign your copyright to us as your publisher.

OA licenses permit the copyright owner and holder to grant and impose conditions on the reuse of the content. By using a Creative Commons License you agree to a partial disclaimer of your rights as a copyright holder. You renounce irrevocably parts of your copyright and agree to the dissemination of your content to third parties free of charge.

Please find below further information about the CC-licenses and their acceptance by authors:

On the CC website: https://wiki.creativecommons.org/Considerations_for_licensors_and_licensees

About the acceptance by authors: [Scholarlykitchen-acceptance authors-licenses](#)

CC-BY-NC-ND license license enjoys the highest acceptance among authors, the CC-BY license the lowest.

5. CC-BY-NC-ND

To abide by and fully comply with our responsibility as publisher of your scientific work and record, Thieme publishes your OA paper under the most recent CC-BY-NC-ND license:

CC-BY-NC-ND (Attribution-Noncommercial-No Derivatives)

Users may **share**, copy, and redistribute the material in any medium or format under the following **conditions**:

Attribution — user must give appropriate credit, provide a link to the license, and indicate if changes were made. User may do so in any reasonable manner, but not in any way that suggests the licensor endorses the user or her/his use.

Noncommercial — user may not use the material for commercial purposes.

No Derivatives — if user remixes, transforms, or builds upon the material, the user may not distribute the modified material.

No additional restrictions — user may not apply legal terms or technological measures that legally restrict others from doing anything the license permits.

Thieme's default license is CC-BY-NC-ND. However, in case of a funder requiring it, you as the author may select another license and we will arrange your publication accordingly.

Please find the relevant information on the submission page of the journal of your choice, as well as on our Copyright Transfer Agreements.
